

Date	How near to the College Hill site do you live?	How often do you visit the property?	Please rank the physical representation options in order of most appealing (1) to least appealing (3)			Which web-based option do you prefer?	Do you have any additional comments, ideas, or suggestions?
			Saving the reservoir railing	Creating an exterior interpretive exhibit	Developing a mural depiction		
3/13/24	Within 1/4 mile	A few times a week	1	3	2	Digitizing College Hill records	Couldn't we do all of the options? Or at least more than one? Could you offer public tours inside the reservoir before it's demolished? I've always been so curious what it's like inside. Also, could you use some of the big trees that will be removed to make benches or something that is incorporated into the final landscape design? Finally, the northwest corner of the small reservoir has always been a great sunset watching spot. Could that be reflected in the final design? Maybe a bench there?
3/13/24	Within 1/2 mile	Never					You've already decided all the options are too expensive, so this feels like you're just "phoning in" a minimal option to placate the vocal few.
3/13/24	Within 1/4 mile	A few times a week	1	3	2		Why bother with the charade? You've already decided! This is just like the forced meter upgrade -- you do what you want, not withstanding what rate payers may want!
3/13/24	Within 1/4 mile	A few times a week	1	3	2		I live across the street from the reservoir and look out at it and walk through it daily. Frankly it is less important to me to memorialize the reservoir and more important that the visual impact is pleasing and that an opportunity for recreation or tai chi or meditation remains. Families have used this site to teach kids bike riding. If financial resources are an issue I would apply 98% to visual appeal and community use and 2% to memorial.
3/13/24	Within 1/4 mile	A few times a month	1	3	2	Digitizing College Hill records	
3/13/24	Within 1/4 mile	A few times a month	3	2	1	Developing a digital exhibit	
3/13/24	Within 1/4 mile	A few times a week	1	2	3		What is most important to me is that there be beautiful landscaping as well as a large flat space for biking, skating, star gazing. The top of the reservoir has been a valuable community space, and I would like to see that continue.
3/13/24	More than 1/2 mile	A few times a month	2	1	3	Developing a digital exhibit	
3/13/24	More than 1/2 mile	A few times a week					<i>Part 1:</i> I speak for myself and for many others in expressing my feelings of disappointment and betrayal in the proposed plans you are laying out. The community has not valued the reservoir for its posts or for its wall. We have valued it for its acres of smooth level concrete, a community meeting place with great utility for recreation and friendship.  We have taught our children to ride their scooters and bikes and at the reservoir they have learned to use their skates and skateboards....
3/13/24	More than 1/2 mile	A few times a week					<i>Part 2:</i> We feel betrayed because we were assured by sincere-sounding EWEB representatives that EWEB would create a new concrete slab for the community's recreation, a new space to replace the one you are preparing to demolish. In your proposals, there is zero acknowledgement of why the community cares so much about the reservoir and had hoped to preserve it. Your proposals read to me as merely a cheap way out of following through on EWEB's previous assurances to us.
3/13/24	More than 1/2 mile	A few times a year	3	1	2	Digitizing College Hill records	
3/13/24	Within 1/4 mile	A few times a month	2	3	1	Digitizing College Hill records	
3/13/24	Within 1/4 mile	A few times a month	2	1	3	Digitizing College Hill records	
3/13/24	Within 1/4 mile	A few times a week	3	1	2	Developing a digital exhibit	

Date	How near to the College Hill site do you live?	How often do you visit the property?	Please rank the physical representation options in order of most appealing (1) to least appealing (3)			Which web-based option do you prefer?	Do you have any additional comments, ideas, or suggestions?
			<i>Saving the reservoir railing</i>	<i>Creating an exterior interpretive exhibit</i>	<i>Developing a mural depiction</i>		
3/13/24	More than 1/2 mile	A few times a week	2	1	3	Digitizing College Hill records	Yes. We need a flat surface for skating, walking, tai chi classes, and star gazing!!! This is so devastating. It is way different than a bike path.. this surface is smooth and easy to skate on . I've seen folks of all ages enjoying this flat surface. Please build something that we can still enjoy these activities
3/13/24	Within 1/2 mile	A few times a week	1	2	3	Developing a digital exhibit	It makes sense that aging infrastructure such as the College Hill reservoir must be replaced as it reaches the end of its life cycle. It's such a large structure, it would be good if there was a large recycle/upcycling plan for any of the materials where possible. And its large "paved" flat space is such a great resource for our community to use for outdoor activities and sporting/athletic pursuits. All efforts should be made to conserve/reimagine that resource in the next design. Good luck!
3/14/24	Within 1/4 mile	A few times a week	1	2	3	Developing a digital exhibit	I think all three physical representations should prioritized as each hold a significance that will memorialize the reservoir in their own way.  I have some other ideas that were not on the options, but discussed with the team:  -Utilize interior cylindrical posts laying horizontally in the landscaping -Similarly place a wall section horizontally in the landscape to show the curvature and design of the exterior, thus not requiring structural support except a gravel pad to place it on.
3/14/24	Within 1/2 mile	A few times a month	1	2	3	Digitizing College Hill records	The existing large reservoir has a few features that could be incorporated into a physical representation. I agree with the concept to save a portion of the railing. I think you are missing an opportunity to capture the artistic exterior concrete formwork. The larger panels (rectangle within a rectangle) and the curved concrete from the lower structure to upper structure could be captured, if not saved, as part of the historic representation. Consider a combination of railing and panels.
3/14/24	Within 1/4 mile	A few times a year	3	1	2	Developing a digital exhibit	I favor an indigenous people's exhibit of the culture, featuring water use and significance, local native plants and the indigenous economy.
3/14/24	Within 1/4 mile	A few times a month	1	2	3	Developing a digital exhibit	Incorporating the railing into a new skating, kid bike riding, flat surface area would be great! So many kids learned to ride their bikes, scooters, skate boards, roller blades, etc... up there, including mine.
3/14/24	Within 1/4 mile	A few times a month	1	2	3	Developing a digital exhibit	I love the idea of saving the railing and installing it as part of new landscaping on the site. I think it's brilliant! This should be combined with ab it of an exhibit explaining the origin of the railing and some other elements - I'm not too picky about how elaborate the exhibit would or wouldn't be.
3/15/24	Within 1/4 mile	A few times a week	1	2	3	Digitizing College Hill records	I'm strongly in favor of re-using the railing, but my assumption is that it would remain located on the site, and that the landscaping would provide a great park-like area for people to walk through similar to how it currently is on the East side of the reservoir. Please restore it to park-like conditions and please replant trees that will eventually grow to the extent of those you're taking down.
3/15/24	Within 1/4 mile	A few times a week	1	2	3	Digitizing College Hill records	
3/16/24	Within 1/4 mile	A few times a week	3	1	2	Developing a digital exhibit	Thank you.  The potential for inadvertently creating an "attractive nuisance" is unfortunately all too real. A thorough analysis and effort will be required to dissuade or prevent tagging and other vandalism onsite.

Date	How near to the College Hill site do you live?	How often do you visit the property?	Please rank the physical representation options in order of most appealing (1) to least appealing (3)			Which web-based option do you prefer?	Do you have any additional comments, ideas, or suggestions?
			<i>Saving the reservoir railing</i>	<i>Creating an exterior interpretive exhibit</i>	<i>Developing a mural depiction</i>		
3/16/24	Within 1/2 mile	A few times a week	1	2	3	Digitizing College Hill records	Keeping a flat, cement space surrounded by a railing would be amazing. There are always people using the reservoir for bike riding, roller skating, scootering, tai chi, etc. my kids learned to ride their bikes there. Having a space which is flat, fenced, and without constraints of a path was incredibly useful. We support maintaining some sort Of flat fenced area. This could be surrounded by a walking path.
3/17/24	More than 1/2 mile	A few times a month	3	2	1	Digitizing College Hill records	I understand needing to end the life of the current reservoir, but none of these options are a sufficient replacement! There needs to continue to be a flat, smooth, large surface available for the public. Thank you!
3/17/24	More than 1/2 mile	A few times a month					The community does not want to save the posts and historic attributes of the reservoir, we just really liked the flat surface provided for families to ride bikes, skate, and dance on. Please don't waste money on a mural. Just reestablish a flat space for community use THATS ALL WE WANT
3/18/24	Within 1/4 mile	A few times a month					A FLAT SAFE SKATE/BIKE/ RECREATION SPACE WITH ELEMENTS FROM ALL OF THE ABOVE CHOICES. WE NEED A SMOOTH FLAT PRACTICE AND GATHERING SPACE THAT IS NOT AS INTIMIDATING AS THE SKATE PARK
3/18/24	Within 1/4 mile	A few times a month	1	2	3		Could the old railing be utilized to create a railing around the old reservoir located North of the reservoir to be demolished? Having the North reservoir available to the Public would be an advantage for kids wanting a safe place to ride their bikes, roller skate, etc. and providing a place for the astronomers club and other community activities.
3/18/24	More than 1/2 mile	A few times a year	1	2	3	Developing a digital exhibit	Roller skaters have been utilizing this space please don't take that from us we don't have a rink anymore :(
3/21/24	Within 1/4 mile	A few times a year	2	1	3	Digitizing College Hill records	Create a park like setting. As much flat surface as possible. That's really what the neighborhood is losing. My feelings about historic mitigation is not spending a lot of money. Digitizing records is reasonable. Maybe signage at new site
3/21/24	More than 1/2 mile	A few times a year	3	1	2	Digitizing College Hill records	The railing idea is probably an interesting option
3/21/24	Within 1/4 mile	A few times a month	1	3	2	Digitizing College Hill records	Preserving a section of the reservoir near by would be nice.
3/21/24	Within 1/4 mile	A few times a month	1	3	2	Digitizing College Hill records	Preserving a section of the reservoir as a sculpture to put back on the site would be interesting.
3/21/24	Within 1/4 mile	A few times a month	1	3	2	Digitizing College Hill records	
3/24/24	Within 1/4 mile	A few times a week	1	2	3	Developing a digital exhibit	It appears that the trees are already coming down, but our neighborhood loves the trees around the reservoir...keeping as many as possible, or making efforts to relocate the smaller trees that can be salvaged by digging up and transplanting (it can be done with mature trees in some cases) would be so appreciated. We'd love for the smaller decommissioned reservoir to the north of the main one to be turned into something safer/more appealing for the neighborhood/community, if it's staying intact.
3/24/24	Within 1/4 mile	A few times a week	2	3	1	Digitizing College Hill records	Why even ask the above if they are cost prohibitive or due to Graffiti it's not advised... I'm already saddened to see the trees cut near the 23rd street entrance off of Lawrence Street. Seems like EWEB isn't really much interested in listening as much as doing what is easiest and cheap. This is a HUGE neighborhood asset being taken away- Yes, I am not facing the reality of the project but it's a sad moment and needs careful input that will actually be heard.

Date	How near to the College Hill site do you live?	How often do you visit the property?	Please rank the physical representation options in order of most appealing (1) to least appealing (3)			Which web-based option do you prefer?	Do you have any additional comments, ideas, or suggestions?
			<i>Saving the reservoir railing</i>	<i>Creating an exterior interpretive exhibit</i>	<i>Developing a mural depiction</i>		
4/2/24	Within 1/4 mile	A few times a month	2	1	3	Digitizing College Hill records	Integrate mitigation opportunities to perpetuate existing activities, which are integral to the site's historic significance and unique uses by the neighborhood community (e.g. provide elevated places for long views; hardscapes for astronomical society functions, family play, skating, and biking; green spaces for dog walking; and paths for traversing the site).
4/2/24	Within 1/4 mile	A few times a month	3	2	1	Digitizing College Hill records	Very sad to see this multi-use open space going away.
4/2/24	Within 1/2 mile	A few times a week	1	2	3	Digitizing College Hill records	Please consider adding textual effects to the new tanks that mimic some of the architectural features of the existing facility so they are not sterile institutional looking orbs but have some semblance of design/character.
4/2/24	Within 1/4 mile	A few times a year	2	1	3	Developing a digital exhibit	
4/2/24	Within 1/2 mile	A few times a year	1	2	3		
4/2/24	More than 1/2 mile	A few times a year	2	1	3	Digitizing College Hill records	
4/2/24	Within 1/2 mile	A few times a week	1	2	3	Digitizing College Hill records	There is a large community of people-roller skaters, roller bladders, and skateboarders- in Eugene that rely on the reservoir as a place to meet and play. Without the reservoir there will be no suitable flat area for roller skaters to convene and meet up. Please consider making a concrete skate area! We have plenty of skateparks in Eugene but no flat and smooth areas for roller skaters.
4/2/24	Within 1/4 mile	A few times a month	1	2	3		As a resident of College Hill for 26 years, I've watched the reservoir be a meeting place for local residents, and a place for kids to learn to bike, skate, and play. The reservoir has also been used for events such as the Eugene Astronomical Society's star gazing. EWEB has done great work reaching out to stakeholders. If some kind of meeting structure can be created to allow for continued use of the site by residents for recreation, star gazing, and city views, that would be exceptional. Thnx
4/2/24	Within 1/2 mile	A few times a week	2	1	3	Developing a digital exhibit	I like the idea of a walk with an interpretive exhibit so as you walk you can stop and read and think about the changes and look about. Thank you.
4/2/24	More than 1/2 mile	A few times a month	1	2	3	Developing a digital exhibit	Be sure to connect the history of the reservoir with the history of College Hill in general. Most folks, for example, have no idea why the area is called College Hill. At one time, there were numerous schools/colleges located there.
4/2/24	Within 1/4 mile	A few times a week				Developing a digital exhibit	Can't there be an enclosed cement area for biking and other purposes? This is such a unique feature of our community.
4/2/24	Within 1/4 mile	A few times a week	1	2	3	Developing a digital exhibit	
4/3/24	Within 1/2 mile	A few times a year	1	3	2	Digitizing College Hill records	
4/3/24	Within 1/4 mile	A few times a week	2	1	3	Digitizing College Hill records	I urge you to strongly consider creating an exterior interpretive exhibit. The reservoir holds much sentimental value for myself and all living in the College Hill/Friendly area neighborhood. We believe in the importance of memorializing the site of the reservoir.
4/3/24	Within 1/2 mile	A few times a month	2	1	3	Developing a digital exhibit	I am close friends with a number of people who for various reasons, are not technologically savy, and who do not have digital access. Being with them consistently reminds me that they, like other groups of marginalized groups & individuals, are left out. Please create equal opportunity when creating any digital exhibits. Thank you
4/3/24	Within 1/4 mile	A few times a month	1	2	3		I think the most meaningful way to honor the reservoir is to preserve / reconstruct an open level space that is publicly accessible, like a minimally fenced version of the current cement tank lid to the immediate north of the structure to be replaced.
4/5/24	More than 1/2 mile	A few times a year	1	2	3	Digitizing College Hill records
