OPEN QUESTION

---

Do you have any additional comments, ideas, or suggestions?

---

I think the most meaningful way to honor the reservoir is to preserve / reconstruct an open level space that is publicly accessible, like a minimally fenced version of the current cement tank lid to the immediate north of the structure to be replaced.

---

I urge you to strongly consider creating an exterior interpretive exhibit. The reservoir holds much sentimental value for myself and all living in the College Hill/Friendly area neighborhood. We believe in the importance of memorializing the site of the reservoir.

---

I am close friends with a number of people who for various reasons, are not technologically savy, and who do not have digital access. Being with them consistently reminds me that they, like other groups of marginalized groups & individuals, are left out. Please create equal opportunity when creating any digital exhibits.  
Thank you
