

Water Storage Project Information

How to contact us and stay informed throughout construction

Construction is underway to build secure, reliable drinking water storage near E. 40th Ave. and Patterson St. Site preparation and earthwork necessary for tank construction will take approximately 6-9 months.

Construction notices and other project updates will be posted on our website: eweb.org/waterstorage.

The latest update includes information about how we are protecting against fire risk.

If you would like to receive email updates about water storage construction projects throughout Eugene, visit our website and click “Join our project email list.”

If you have any questions or concerns throughout the construction process, please reach out to us by email at water.storage@eweb.org or by phone at 541-685-7899.
